

MeshTalk Video Tutorial Kit (Visme Ready)

This document includes ready-to-use prompts, scene layout, and voiceover dialogs for creating a polished MeshTalk video in Visme.

1) Project Goal

- Create a 90-second promo + tutorial video for MeshTalk.
- Explain problem, solution, how mesh networking works, key features, and clear download CTA.
- Tone: modern, inspiring, humanitarian, startup-professional.

2) Video Settings

- Duration: 90 seconds
- Aspect ratio: 16:9 (Full HD 1080p)
- Visual style: Dark UI with red/cyan accents, smooth transitions
- Output: Subtitles ON + voiceover-ready scene text

3) Provided App Images

4) Scene-by-Scene Layout + Dialog + Prompt

Scene 1 (0-8s) — Hook

- Layout: no-network/disaster visual. Text: "When internet fails, communication should not."
- Voiceover: "What happens when the internet goes down, but people still need help?"
- Prompt: "Cinematic dark intro, no-signal visual, emergency atmosphere, bold white text, smooth zoom-in."

Scene 2 (8-18s) — Problem

- Layout: people unable to call/message. Text: "Billions face unreliable connectivity."
- Voiceover: "In disasters and remote areas, normal apps stop working. People are left disconnected."
- Prompt: "Human-focused scene, failed communication visuals, minimal icons, dark overlay."

Scene 3 (18-30s) — Solution Intro

- Layout: MeshTalk logo + phone mockup. Text: "Meet MeshTalk."
- Voiceover: "MeshTalk is an offline communication app that works without internet."
- Prompt: "Modern app reveal, glowing logo, smartphone mockup, red/cyan accent lighting."

Scene 4 (30-45s) — How It Works

- Layout: 3-4 phones with connection lines (A→B→C). Text: "Messages hop device-to-device."
- Voiceover: "Using WiFi Direct mesh networking, messages travel from phone to phone."
- Prompt: "Animated mesh diagram with phones and dotted links, clean infographic style."

Scene 5 (45-62s) — Feature Highlights

- Layout: feature cards animation.
- Voiceover: "It supports fully offline chat, real-time AI translation, and emergency message detection."
- Prompt: "Cards for: 100% Offline Chat, AI Translation, Emergency Detection, No Ads/No Tracking."

Scene 6 (62-75s) — Mini Demo

- Layout: open app → connect devices → send message.
- Voiceover: "Open MeshTalk, connect nearby devices, and send messages instantly."
- Prompt: "Step-wise phone UI animation with tap effects and clean transitions."

Scene 7 (75-85s) — Impact

- Layout: emergency/rural communication visuals.
- Voiceover: “From disaster response to remote communities, MeshTalk keeps people connected.”
- Prompt: “Emotional humanitarian visuals, hopeful tone, cinematic fade.”

Scene 8 (85-90s) — CTA

- Layout: logo + GitHub releases screenshot.
- Voiceover: “MeshTalk. Communication without limits. Try it now.”
- Prompt: “Strong ending frame, centered logo, CTA text: Download from GitHub Releases.”

5) Master Prompt (Paste into Visme AI)

Create a 90-second 16:9 HD promo/tutorial video for “MeshTalk,” an offline mesh communication app. Use a dark modern tech style with red and cyan accents. Include subtitles and smooth transitions. Structure: Hook (internet failure), problem (communication breakdown), solution intro (MeshTalk), how mesh networking works (phone-to-phone message hopping), key features (offline chat, AI translation, emergency detection, no ads/no tracking), mini app demo flow, real-world impact, and final CTA to download from GitHub Releases. Use cinematic but clean visuals, high readability text, and medium-energy inspirational background music. Tone should be humanitarian, practical, and startup-professional.

6) Quick Visme Upload Steps

- Open Visme → Create New → Video (16:9).
- Paste the Master Prompt.
- Upload app screenshots and replace stock placeholders.
- Insert voiceover lines scene by scene.
- Enable subtitles, preview timing, and export MP4 1080p.
